

Roadmap

Supreme Art

Not another derivative, our unique art will make you stand out in the crowd of boring repetitive NFT projects. *Omega Knights* rarity and hierarchy is still under work, will be published soon.

Play 2 Earn

We're developing a P2E multiplayer shooter PvP. We have a working demo of the game we hope to ship soon.

Game rewards will come in our upcoming token, and *Omega Knights NFT* holders will have improved attributes and rewards.

Omega Knights NFT holders will receive airdrops of epic weapons and relics, giving them a significant advantage over non-holders players.

Omegaverse

Omega Knights were forged in 3D, hence are native citizens of the *Metaverse*. We're working on building the branding and utility on top of *Omega Knights*.

Omega Knights ownership is mandatory to gain access to the *Omegaverse*.

We plan on having holders exclusive merchandise through the members only *Omegacub*. Holders will get prestigious whitelist spots, giveaways and airdrops.

Free NFT

Omega Knights are here to protect us all, but wherever there is good, evil will come soon. *Omega Knights* holders will receive a free NFT drop of the evil *Alpha Horde*.

Community Focused

We constantly work on growing our *Omega Knights* community on *Discord* and *Twitter*.

Early supporters will get whitelist access, holders will receive various giveaways, *Omega Knights* will also participate in charity initiatives.

Before the minting date, we'll airdrop *Omega Knights* to the most active members to thank them for their support.

Omega Knights continuously evolve, post minting date we'll work on formalizing our *on-chain* governance system to ensure fair participation for all holders.

We plan on listing the project on all major marketplaces to ensure maximal value and liquidity to holders.

We have and will expand our partnerships on behalf of the holders.

Team Expansion

Omega Knights recruits only the best and brightest to their ranks, for the role of *Discord Knight Moderators*.
